

SANELE ZWANE

Aspiring Data Analyst | Quality Control & Laboratory Professional

Gauteng, South Africa | 0792366109 | zwanesanele22@gmail.com | [GitHub Portfolio](#)

PROFESSIONAL SUMMARY

Quality Control professional with hands-on laboratory experience and a National Diploma in Food Technology, currently transitioning into data analytics. Completing a hands-on data analytics course with Brightlearn (May–August 2026) covering Excel, SQL, data visualisation, data agents, machine learning, and Power BI, which complements my existing laboratory and quality background. Experienced in working with structured data through LIMS, and now building skills in SQL querying, data analysis, and dashboard reporting. Looking to apply strong attention to detail, analytical thinking, and technical discipline to a data analyst role.

SKILLS

- Data Analysis & Visualisation: Excel (pivot tables, charts), Power BI, dashboard and KPI reporting
- SQL & Databases: writing queries, joins, aggregations, data quality checks (practiced on Databricks)
- Emerging Skills: data agents, machine learning fundamentals, data-driven business insights
- Laboratory & Quality Systems: LIMS data capturing, HACCP, GMP, ISO/FSSC quality standards
- Tools: Microsoft Excel, Power BI, SQL, Databricks, GitHub
- Core Strengths: attention to detail, accuracy, problem-solving, report writing, stakeholder communication

WORK EXPERIENCE

Laboratory Technician — Designer Water

January 2026 – Current

- Conduct laboratory tests on water samples to verify quality against set standards.
- Capture and manage test results in the LIMS, ensuring data accuracy and traceability.
- Analyse test result trends to flag deviations and support quality decision-making.
- Maintain accurate, structured records used for reporting and compliance.

Quality Control Analyst — Premier FMCG

October 2023 – December 2026

- Performed quality checks on production batches and monitored data trends to support corrective action.

DATA ANALYTICS PROJECT

Bright Coffee Shop — Business Analytics Project — Brightlearn

2026

- Analysed sales data for a coffee shop business to uncover trends and generate insights.
- Wrote SQL queries in Databricks to check data quality and answer key business questions.
- Built Excel pivot tables and charts covering revenue breakdown and day-of-week trends.
- Designed a data pipeline architecture diagram and presented recommendations to leadership.
- Published all SQL code and project work to GitHub (link above).

EDUCATION

National Diploma in Food Technology — University of Johannesburg (2024)

Data Analytics Programme (In Progress) — Brightlearn

May 2026 – August 2026

- Hands-on programme covering the full data analytics workflow, from data cleaning to business reporting.
- Excel: pivot tables, charts, and dashboard building for business reporting.
- SQL: writing queries, joins, aggregations, and data quality checks (practiced on Databricks).
- Data Visualisation: building clear, insight-driven charts and dashboards for decision-making.
- Power BI: building interactive dashboards and reports.
- Data Agents: working with AI-driven data agents to support analysis.
- Machine Learning: fundamentals of machine learning concepts and applications.
